	Total		34,044	31,255,852	100.0

| **Variable Name:** | PHSDFLG | **Length:** | 1.0 | **Position:** 25 |

Question Name:

Concept: Respondent has a spouse/partner in the household

Question Text:

Universe: All respondents

Note: This derived variable identifies respondents who declared having a spouse/partner living in the household at the relationship question.

In less than 1% of cases, respondents who reported being widowed, separated, divorced, or single (never married) at the marital status question reported, at the relationship question, that someone in their household was their husband/wife or common-law partner. For these cases, there is information for a spouse/partner at PHSDFLG, although the respondent's marital status (MARSTAT) is not married or common-law.

Source: General Social Survey, Social Identity 2020, derived from the household roster (RRS3_Q15A, RRS3_Q15B and RRS3_Q15C) and relationship question (RSR2_Q30).

Answer Categories	Code	Frequency	Weighted Frequency	%
Yes	1	17,912	18,184,240	58.2
No	2	16,132	13,071,612	41.8
Valid skip	6	0	0	0

Refusal	98	0	0	0
Not stated	99	0	0	0
Total		34,044	31,255,852	100.0

Variable Name:	GENDER2P	**Length:** 1.0		**Position:** 28

Question Name:

Concept: Gender (2) after distribution of the non-binary person

Question Text:

Universe: All respondents

Totals may not add up due to rounding.

Note:	Given that the non-binary population is a small population, data aggregation is necessary in order to protect the confidentiality of responses provided by respondents. Most information from the General Social Survey, Social Identity 2020 is disseminated using a two-category gender variable. In these cases, people in the category 'non-binary person' are distributed in the other two gender categories.

Source: General Social Survey, Social Identity 2020, derived from GENDER2.

Answer Categories		Code	Frequency	Weighted Frequency	%
Men+		1	16,690	15,462,315	49.5

Question Name:

Concept: Labour force status

Question Text:

Universe: All respondents

Note: This derived variable indicates whether a person was employed, unemployed, not in the labour force, or if their labour force status was unable to determine during the reference week. These classifications are based on the Labour Force Survey. A description is available in the Guide to the Labour Force Survey, on Statistics Canada's website.

The definition of the "reference week" for the labour force and labour market activities questions was based on the date of the interview. It was the most recently completed seven-day period beginning on a Sunday and ending on the following Saturday.

Variable Name:	RPM_03	**Length:** 2.0		**Position:** 208

Question Name:

Concept: Highest degree of education - Parent A

Question Text: What is the highest certificate, diploma or degree that your Parent A has completed?

Universe: All respondents

Note: Some response categories were abbreviated due to space restrictions.

Full text is as follows:
02 High school diploma or a high school equivalency certificate
04 College, CEGEP or other non-university certificate or diploma (other than trades certificates or diplomas)
07 University certificate, diploma or degree above the bachelor's level

Parent refers to the legal father, mother or parent of the person. Because of the possibility of multiple parents and same sex parents, we refer to them as parent A and B.

It is up to the respondent to decide which parent to list as A and which as B.
This derived variable indicates the country of birth of the respondent based on a variant of the Standard Classification of Countries and Areas of Interest (SCCAI) 2018.

Source: General Social Survey, Social Identity 2020.

Question Name:

Concept: General health

Question Text: In general, how is your health?

Universe: All respondents

Note: Perceived health is an indicator of overall health status. It can reflect aspects of health not captured in other measures, such as: incipient disease, disease severity, aspects of positive health status, physiological and psychological reserves and social and mental function. Perceived health refers to the perception of a person's health in general. Health means not only the absence of disease or injury but also physical, mental and social well-being.

Variable Name:	LANHSD_C	**Length:** 2.0			**Position:** 353

Question Name:

Concept: Language spoken most often at home

Question Text:

Universe: All respondents

Note: This derived variable is the classification of language spoken most often at home.

Language spoken most often at home refers to the language the person speaks most often at home at the time of data collection. A person can report more than one language as "spoken most often at home" if the languages are spoken equally often.

For a person who lives alone, the language spoken most often at home is the language in which he or she feels most comfortable.

Source: General Social Survey, Social Identity 2020, derived from LAN_Q02A,LAN_Q02B and LAN_Q02C.

Answer Categories		Code	Frequency	Weighted Frequency	%
English only		01	17,708	18,450,365	59.0
French only		02	3,997	5,531,159	17.7

Variable Name: LANCH_C **Length:** 2.0 **Position:** 355

Question Name:

Concept: Mother tongue

Question Text:

Universe: All respondents

Note: Mother tongue refers to the first language learned at home in childhood and still understood by the person at the time the data was collected. If the person no longer understands the first language learned, the mother tongue is the second language learned. For a person who learned more than one language at the same time in early childhood, the mother tongue is the language this person spoke most often at home before starting school. The person has more than one mother tongue only if they learned these languages at the same time, and still understands them.

Variable Name: INC_C **Length:** 2.0 **Position:** 357

Question Name:

Concept: Income - Total (before tax)

Question Text:

Totals may not add up due to rounding.

Universe:	All respondents			

Note: This derived variable represents total income of the respondent received in the calendar year 2019 from all sources before income taxes and deductions, including wages and salaries, self-employment income, government transfers, investment income, private retirement pensions and any other income, excluding capital gains or losses.

To reduce respondent burden and improve quality, the 2020 GSS SI income related variables are derived from respondent income tax files for calendar year 2019. Some inconsistencies may become apparent when using income variables with other variables and care must thus be exercised. For example, the labour force status reflects the respondent's situation during the last complete week prior to the interview day and therefore not the calendar year 2019. Thus, this variable may not be coherent with the income earned in 2019 because individuals may have altered their work activities between the two reference periods.

Users should be aware that Statistics Canada income definitions do not always correspond to concepts used by other organizations. For example, the definition of total income in the 2020 GSS SI does not correspond to that used by the Canada Revenue Agency.

Source: T1FF 2019 (XTIRC).

Answer Categories	Code	Frequency	Weighted Frequency	%
Less than $24,999	01	9,826	10,003,517	32.0
$25,000 to $49,999	02	9,465	8,194,044	26.2
$50,000 to $74,999	03	7,114	6,237,639	20.0
$75,000 to $99,999	04	3,698	3,214,797	10.3

Variable Name:	FAMINC_C	**Length:** 2.0		**Position:** 359

Question Name:

Concept: Family income - Total (before tax)

Question Text:

Universe: All respondents

Note: This derived variable represents the sum of the incomes of all members of the census family received in the calendar year 2019 from all sources before income taxes and deductions, including wages and salaries, self-employment income, government transfers, investment income, private retirement pensions and any other income, excluding capital gains or losses. 'Census family' refers to a married couple (with or without children of either and/or both spouses), a common-law couple (with or without children of either and/or both partners) or a lone parent of any marital status, with at least one child.

To reduce respondent burden and improve quality, the 2020 GSS SI income related variables are derived from respondent income tax files for calendar year 2019.

Some inconsistencies may become apparent when using income variables with other variables and care must thus be exercised.

Users should be aware that Statistics Canada income definitions do not always correspond to concepts used by other organizations. For example, the definition of total income in the 2020 GSS SI does not correspond to that used by the Canada Revenue Agency for income tax purposes.

When a respondent aged 15 years could not be linked to tax files, a taxable income of zero was assumed in the calculation of FAMINC and FAMINCG1.
